Microsoft Office

Explore Microsoft courses to find various software specifically designed for your professional needs. Get a closer look at Word, Excel, PowerPoint, Outlook, Access, Visio, and Visual Basic.

Microsoft Office

Excel 2019 Level Series

This course covers MOS Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2019): Exam MO-200 and Excel Expert (Office 365 and Office 2019): Exam MO-201 certifications.

Excel 2019 – Level 1 — 1 Day

→ This course aims to provide you with a foundation for Excel knowledge and skills, which you can build upon to eventually become an expert in data manipulation.

- Using Microsoft Windows 10
- Microsoft Windows 10: Transition from Windows 7

Excel 2019 – Level 2 — 1 Day

→ This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2019-Level 1 course and will help start you down the road to creating advanced workbooks and worksheets that can help deepen your understanding or organizational intelligence.

- Excel 2019 – Level 1

Excel 2019 – Level 3 — 1 Day

→ This course builds upon the foundational knowledge presented in the Microsoft Office Excel 2019-Level 1 & 2 courses to help you get the most of your Excel experience. The ability to collaborate with colleagues, automate complex or repetitive tasks, and use conditional logic to construct and apply elaborate formulas and functions will put the full power of Excel right at your fingertips.

- Excel 2019 – Level 1
- Excel 2019 – Level 2

Word 2019 – Level Series

This course covers MOS Program exam objectives to help you prepare for the Excel Associate (Office 365 and Office 2019): Exam MO-200 and Excel Expert (Office 365 and Office 2019): Exam MO-201 certifications.

Word 2019 – Level 1 — 1 Day

→ This course is designed to help you move smoothly through the task of creating professional looking documents.

- Using Microsoft Windows 10
- Microsoft Windows 10: Transition from Windows 7

Word 2019 – Level 2 — 1 Day

→ In this course, you will work with features such as formats, styles and templates to create professional documents with a consistent look and feel. You will add visual interest to your documents by using the tables and charts features.

- Word 2019 – Level 1

Word 2019 – Level 3 — 1 Day

→ This course enables you to do far more than simple word processing. Word includes advanced image manipulation tools, collaboration features, cross-referencing and linking tools, entry forms and data collection, security features and tools to automate document production.

- Word 2019 – Level 1
- Word 2019 – Level 2

Learn to Succeed

Microsoft Office

PowerPoint 2019 – Level Series

In this course, you will use PowerPoint 2019 to begin creating engaging, dynamic multimedia presentations.

PowerPoint 2019 – Level 1　　1 Day

→ By learning how to use the vast array of features and functionality contained within PowerPoint 2019, you will gain the ability to organize your content, enhance it with high-impact visuals, and deliver it with a punch. In this course, you will use PowerPoint 2019 to begin creating engaging, dynamic multimedia presentations.

- Using Microsoft Windows 10
- Microsoft Windows 10: Transition from Windows 7

PowerPoint 2019 – Level 2　　1 Day

→ This course is suited for those using Microsoft PowerPoint Level 2. This course will be taught using Microsoft PowerPoint. Meetings, instruction, training, pitches; these are all a part of our daily lives. We are often called upon to deliver presentations with little notice, at multiple venues, and with varying requirements.

Outlook 2019 – Level Series

This course covers MOS Program exam objectives to help you prepare for the Outlook Associate (Office 365 and Office 2019): Exam MO-400 Certification.

Outlook 2019 – Level 1　　1 Day

→ In this course, you will use Outlook to send, receive, and manage email messages, manage your contact information, schedule appointments and meetings, create tasks and notes for yourself, and customize the Outlook interface to suit your working style.

- Using Microsoft Windows 10

Outlook 2019 – Level 2　　1 Day

→ In this course, you will customize command sets, configure mail accounts, set global options, perform advanced searches, apply filters to intercept mail and control spam, create rules to automate mail management tasks, work with calendars and contacts, manage tasks, preserve data with archives and data files, as well as share and delegate access to your Outlook items.

- Outlook 2019 – Level 1

Access 2019 – Level Series

This course focuses on the design and construction of an Access database – viewing, navigating, searching and entering data in a database, as well as basic relational database design and creating simple tables, queries, forms and reports.

Access 2019 – Level 1　　2 Days

→ To ensure success, students should have end-user skills with any current version of Windows, including being able to start programs, switch between program, locate saved files, close programs, and access websites using a web browser. To meet this prerequisite, you can take any one or more of the following Logical

Access 2019 – Level 1

→
- Using Microsoft Windows 10
- Microsoft Windows 10: Transition from Windows 7

Access 2019 – Level 2　　2 Days

→ This course is intended to build on foundational knowledge that was gained in Part 1 to impart an intermediate level of knowledge of Access 365. We will cover how to complete advanced form design tasks, add data validation, explore macros, better manage databases, secure databases, and much more.

- Access 2019 – Level 1

Microsoft Office

Visio 2019: Level 1   1 Day

Microsoft Visio® provides you with an intuitive, customizable tool to easily create a professional-looking visual product by using its extensive gallery of shapes.From the earliest eras of human existence, visual images have been used to represent knowledge, data, and information. Beginning with the Paleolithic cave paintings and continuing to today's most complex computer networks, these images leverage the ability of the human brain to rapidly perceive patterns and trends from visual representations.

Visio 2019: Level 2   1 Day

Microsoft Visio stands out among similar applications because of its unique ability to draw a wide variety of diagrams, flowcharts, workflows, and organization structures—anything that can be represented by shapes connected by lines. Most importantly, these shapes can be rearranged and with corresponding lines remaining intact.

MS Project 2019: Level 1   1 Day

This course covers the critical knowledge and skills a project manager needs to create a project plan with Project during the planning phase of a project. In other words, if your supervisor assigns you to lead a project, this course will enable you to draft a project plan with Project and share it with your supervisor (and others) for review and approval.

MS Project 2019: Level 2   1 Day

This course covers the advanced knowledge and skills a project manager needs to update a project plan in Project during the execution, monitoring, and controlling phases of a project. In other words, once your project plan is approved by the project sponsor, this course will enable you to manage the project so that it is completed on time, within budget, and according to scope.

Microsoft Excel Visual Basic Applications (VBA)   3 Days

In this course, participants will examine the Visual Basic for Applications Environment and create custom procedures to enhance the functionality of Excel.

Excel 2010 Programming with Visual Basic for Applications (VBA)

In this course, participants will examine the Visual Basic for Applications Environment and create custom procedures to enhance the functionality of Excel.

- Intermediate skills in Microsoft Excel 2010
- Recommended for participants to complete Excel 2010 Level 3 before sitting for this program

Excel 2013 Programming with Visual Basic for Applications (VBA)

In this course, participants will examine the Visual Basic for Applications Environment and create custom procedures to enhance the functionality of Excel.

Excel 2016 Programming with Visual Basic for Applications (VBA)

In this course, participants will learn how to simplify their work in the Excel environment by automating many of the repetitive tasks that are part of spreadsheet development.

Excel Dashboard 2016   2 Days

This 2-day course is designed for students who already have foundational knowledge and skills in Excel 2016 and wish to begin taking advantage of some of the higher-level functionality in Excel to summarize table data in Excel by using functions, charts, and pivot tables and display those elements in a dashboard format.

Microsoft Office

Microsoft Office Specialist (MOS) Excel 2019

3 Days

→ The Microsoft Office Specialist: Excel Associate Certification demonstrates competency in the fundamentals of creating and managing worksheets and workbooks, creating cells and ranges, creating tables, applying formulas and functions and creating charts and objects. The exam covers the ability to create and edit a workbook with multiple sheets, and use a graphic element to represent data visually. Workbook examples include professional-looking budgets, financial statements, team performance charts, sales invoices, and data-entry logs.

Office 365 for End Users

1 Day

→ The Microsoft Office 365 is a suite of cloud-based applications by Microsoft. This suite of applications provides the users with Microsoft Office applications in a cloud-based environment. This course is an introductory course and gives the students an overview and working knowledge of using Microsoft Outlook, Microsoft Office and other Microsoft applications on Microsoft Office 365 platform.

Unleash your productivity with Microsoft Office

Microsoft Office provides flexible and powerful tools to deliver your best work, whether at the office or at home. With improved data protection and real-time document co-authoring, Office 2019 makes working across devices effortless.

Get more done and achieve your goals with Microsoft Office! Enrol Now!

Adobe

Boost your digital marketing campaigns, create animation, and enhance your creative design skills with the renowned Adobe courses in Photoshop, Illustrator, InDesign, Dreamweaver, and Flash software.

Adobe

Adobe Photoshop CS6   1 Day

Adobe Photoshop CS6 is the industry-standard image editing software and is widely used by photographers and graphic designers to perfect their visual images. If you work in the media industry or in the fields of marketing, graphics, film production and visual communication, learning Adobe Photoshop CS6 is a necessity.

Photoshop CS6 – Level 1

→ This level focuses on the basic features of Photoshop so that the participant can navigate the environment and use the Photoshop tools to work with photographic images.

Photoshop CS6 – Level 2

→ This level delves into some of the more advanced image creation and editing techniques and hands-on activities that demonstrate how Photoshop techniques can be used in combination to create exciting visual effects.
  - Photoshop CS6 – Level 1

Adobe InDesign CS6   1 Day

Adobe InDesign CS6 is a professional desktop publishing application that lets you create professional layouts for print and digital publishing. Master all aspects of desktop publishing using Adobe InDesign CS6 with ITEL Learning Systems instructor-led classes which will teach from introductory to advanced topics and help you create professional documents and publications using hands-on examples.

InDesign CS6 – Level 1

→ Adobe InDesign CS6 course gives you all the tools you need to give your documents a well-designed, professional look, including Paragraph and character styles, layout features, and customized text and graphics.

InDesign CS6 – Level 2

→ In this course, participants will learn advanced InDesign techniques to enhance the look and functionality of the documents.

Adobe Illustrator CS6   1 Day

Learn and master Adobe Illustrator CS6 with ITEL hands-on training courses. Our Adobe Illustrator CS6 classes are tasked-based and focus on real-world uses and challenges that individuals face in their day-to-day work environments.

Illustrator CS6 – Level 1

→ In this course, participants will learn to create "drawn" graphics, integrating content form other CS6 domains (such as photo-oriented graphics and animation, which belongs to Photoshop and Flash).

Illustrator CS6 – Level 2

→ In this course, participants will learn to create complex artwork using advanced tools, options, and effects to prepare artwork for commercial printing and save it for the Web. Students will draw complex illustrations, and enhance them using various painting options.

Adobe Dreamweaver CS6   1 Day

Adobe Dreamweaver CS6 is an all-in-one visual development tool that allows you to create, publish, and manage websites and mobile content. Dreamweaver CS6 provides a visual workflow with advanced site management capabilities and support for technologies such as:

- JavaScript
- PHP
- XML

Dreamweaver CS6 – Level 1

→ In this course, participants will use Adobe Dreamweaver CS6 to create web pages while focusing on the content, styling and design. As web pages are created, Dreamweaver CS6 will competently created the XHTML, CSS and JavaScript.

Dreamweaver CS6 – Level 2

→ In this course, participants will create fluid CSS layouts, implement mobile integration techniques, and share files over a server to work in a collaborative manner.

Adobe

Adobe Flash CS6   **1 Day**

Adobe Flash CS6 is a powerful tool to create interactive animation and immersive multimedia content. Adobe Flash CS6 enables users to easily combine multiple symbols and animation sequences into a single optimized sprite sheet for better workflow, build more engaging content using native extensions to assess device-specific capabilities, and create assets and animations for use in HTML5.

Flash CS6 – Level 1

→ In this course, student will learn to navigate the Adobe Flash CS6 interface, and gain knowledge in using the tools and features necessary for drawing graphics and creating a website that contains an animated introduction.

Flash CS6 – Level 2

→ In this course, students will gain an understanding of ActionScript and other advanced features of Flash, importing content from external sources, such as XML and video files, and create items that respond to user interaction.
- Flash CS6 – Level 1

Adobe Captivate 2019   **3 Days**

During this 3-day course, participants will learn the basic and advanced skills required to create powerful eLearning media covering recording demonstrations. Adobe Captivate is a powerful development tool for creating interactive eLearning and HTML5 based mLearning content deliverable to almost any device.

- Good Design Sense
- Knowledge of PowerPoint
- Basic knowledge of Adobe Flash is useful but not essential

Cybersecurity

Protect your systems, networks, and programs from digital attacks by mastering these cybersecurity courses. Take the certifications and be more resilient in facing cyberattacks in your company.

Cybersecurity

Network Defender (SF) **5 Days**
Course reference number: TGS-2018500737 (OLL)

→ This 5-day instructor-led course focuses on creating Network Administrators who are trained in protecting, detecting, and responding to the network threats.

Certified Ethical Hacker (CEH) (SF) **5 Days**
Course reference number: TGS-2023035654 (ILT)
TGS-2023021378 (OLL)

→ Certified Ethical Hacker (CEH) is the world's most advanced certified ethical hacking course that covers 20 of the most current security domains any individual must know when they are planning to beef-up the information security posture of their organization.

Cyber Threat Intelligence Analyst (SF) **3 Days**
Course reference number: TGS-2023021376 (ILT)
TGS-2023035645 (OLL)

→ This highly interactive and comprehensive program differentiates threat intelligence professionals from other information security professionals. This standards-based training program teaches information security professionals to build professional threat intelligence.

EC Council Certified Encryption Specialist **3 Days**

→ The EC-Council Certified Encryption Specialist (E|CES) program introduces professionals and students to the field of cryptography. The participants will learn the foundations of modern symmetric and key cryptography including the details of algorithms such as Feistel Networks, DES, and AES.

CCSE: EC-Council's Certified Cloud Security Engineer **5 Days**

→ This course is specially curated by cloud security professionals in collaboration with subject matter experts from around the globe. C|CSE is a hands-on learning certification course that adopts a detailed and methodological approach to teaching the fundamental concepts of cloud security.

Security Analysis and Penetration Testing (SF) **5 Days**
Course reference number: TGS-2023035651 (ILT)
TGS-2023035643 (OLL)

→ CPENT's live practice range will take you to the next level by teaching pen test IoT systems and OT systems. You will also learn to write exploits, build tools, conduct advanced binaries exploitation, double pivot to access hidden networks, and customize scripts & exploits to get into the innermost segments of the network.

Information Systems Security (SF) **3 Days**
Course reference number: TGS-2023035649 (ILT)
TGS-2023021373 (OLL)

→ This 5-day cyber security course (CISSP) backed by (ISC²) will expand upon your knowledge addressing the essential elements of the eight domains that comprise a Common Body of Knowledge (CBK)® for information systems security professionals.

Cyber Forensic Investigator (SF) **5 Days**
Course reference number: TGS-2023035653 (ILT)
TGS-2023035641 (OLL)

→ The SF – CFI course or Computer Hacking Forensic Investigator Version 9 (CHFIv9) is a comprehensive course covering major forensic investigation scenarios that enable participants to acquire necessary hands-on experience on various forensic investigation techniques and standard forensic tools necessary to successfully carry out a computer forensic investigation leading to the prosecution of perpetrators.

Cyber Security Incident Handling and Response (SF) **3 Days**
Course reference number: TGS-2023021381 (ILT)
TGS-2023035650 (OLL)

→ This program focuses on a structured approach for performing the incident handling and response (IH&R) process including incident handling and response preparation, incident validation and prioritization, incident escalation and notification, forensic evidence gathering and analysis, incident containment, systems recovery, and incident eradication

Learn to Succeed

Business Skills

Carry out your business tasks effectively and upscale your performance by maximizing available resources. Learn how to manage your business and professional life by enrolling in our business skills courses.

Business Skills

Project Management (SF) – PMP®   **5 Days**

Course reference number: TGS-2023035646 (ILT)
TGS-2023021366 (OLL)

→ This 5-day program is designed for Project Managers, working professionals and individuals involved in in-house or client projects, aiming to certify their skills by obtaining the renowned Project Management Professional (PMP)® certification.

Certified in Business Analytics (CBA)   **5 Days**

→ This 4-day specialized course covers the concept of Business Analytics and its key importance to any organization. This course provides an overview of the world of analytics and will learn the various applications of analytics and analytics cycle.

ITIL® Foundation Certificate in Service Management (SF)   **3 Days**

Course reference number: TGS-2023035644 (ILT)
TGS-2023021365 (OLL)

→ This course provides the learners with an understanding of the ITIL® 4 Service Management framework and how it has evolved to adopt modern technologies and ways of working.

ITIL® Specialist – Create, Deliver and Support (CDS)   **3 Days**

→ The ITIL Specialist: Create, Deliver and Support module is for IT practitioners and leaders who design digital products and services, and who deliver and support them to agreed levels. This includes development, deployment, and monitoring activities.

ITIL® Strategist – Direct, Plan and Improve (DPI)   **3 Days**

→ This unique and central course covers requirements in both the ITIL® Managing Professional and ITIL® Strategic Leader designations.

ITIL Specialist High Velocity IT   **3 Days**

→ The ITIL 4 Specialist: High-velocity IT module is for IT managers and practitioners who work in digital or highly automated environments, or who deliver digital products and services. This includes anyone involved in digital transformation and anyone transitioning to Lean, Agile, or DevOps ways of working.

ITIL Specialist Drive Stakeholder Value   **3 Days**

→ The ITIL 4 Specialist: Drive Stakeholder Value module is for IT professionals who foster relationships with stakeholders to co-create value. Drive Stakeholder Value benefits anyone who manages customer journeys, experiences, or expectations.

ITIL Leader Digital & IT Strategy   **3 Days**

→ The ITIL 4 Leader: Digital and IT Strategy module provides guidance about crafting a digital vision and shaping IT and business strategies. Digital and IT Strategy will be invaluable for leaders across your organization, including directors, department heads, and aspiring C-Suite professionals.

PRINCE2® Foundation Certificate in Project Management   **2 Days**

→ PRINCE2 Foundation provides the theoretical knowledge of how to plan, manage and deliver projects from start to finish. A pass at Foundation level is a prerequisite for the Practitioner certification.

PRINCE2® Practitioner Certificate in Project Management   **3 Days**

→ PRINCE2® (Projects IN Controlled Environments) is one of the world's most popular project management methodologies. PRINCE2® is a credible and prominent methodology concentrating on boosting productivity and extracting the best from resources.

Business Skills

Lean Six Sigma Green Belt Certification
4 Days

Course reference number: TGS-2018500737

→ Lean Six Sigma Green Belt (LSSGB) is catered to a professional, who is well trained in the Lean Six Sigma methodology who both leads or supports improvement projects, typically as a part-time role. A Lean Six Sigma Green Belt possesses a detailed knowledge about how to use Six Sigma tools and how to use standard principles of Lean.

Lean Six Sigma Black Belt Certification
5 Days

→ Lean Six Sigma Black Belt (LSSBB) is catered to a professional, who is well versed in the Lean Six Sigma methodology, who leads improvement projects, typically in a full-time role. A Lean Six Sigma Black Belt possesses a thorough understanding about how to perform and interpret Six Sigma tools and how to use standard principles of Lean.

Business Analysis Professional (SF)
5 Days

Course reference number: TGS-2018502761 (OLL)

→ The Certified Business Analysis Professional™ (CBAP ®) designation is a professional certification for individuals with extensive business analysis (BA) experience. CBAP® recipients are the leading, senior members of the BA community. This 5-day instructor-led course engages participants in using lab-intensive tools and methodologies to improve, manage and create better projects that meet the customers' and organizations' expectations.

DevOps Foundation
3 Days

→ The DevOps Foundation course provides a baseline understanding of key DevOps terminology to ensure everyone is talking the same language and highlights the benefits of DevOps to support organizational success.

TOGAF 9.1 Level 1 Foundation
3 Days

→ The Open Group TOGAF® 9.1 standard is a proven Enterprise Architecture methodology and framework. It has been built up over several years through open participation and collaboration between leading industry practitioners to become the most prominent and reliable Enterprise Architecture standard worldwide. Professionals fluent in the TOGAF® standard enjoy greater industry credibility, job effectiveness, and career opportunities. TOGAF® 9 provides an Architecture Development Method, Content Framework and Capability Framework that can be used as the basis for creating an organization's Enterprise Architecture.

TOGAF 9.1 Level 2 (Certified)
5 Days

→ The TOGAF® Standard, Version 9.2 is an improvement to the TOGAF® Standard, Version 9.1, providing improved guidance, fixing errors, refining the document structure, and removing obsolete content. The TOGAF® 9 Training Course: Level 2 Certified is a classroom-based course based on TOGAF® Standard, Version 9.2. This training provides an opportunity to architects and aspiring architects to strive for greater industry credibility and better career opportunities by possessing the updated knowledge and skill-set based on TOGAF Standard, Version 9.2.

DevOps Advance
5 Days

→ The DevOps Leader course is a unique and practical experience for participants who want to take a transformational leadership approach and make an impact within their organization by implementing DevOps. Leading people through a cultural transformation requires new skills, innovative thinking, and transformational leadership. Leaders up, down and across the IT organization must align and collaborate to break down silos and evolve the organization.

CompTIA+

Build a strong skillset in the industry standard for establishing a career in IT field. Complete certifications in hardware management, operating system installation, troubleshooting, networking, and more.

CompTIA

CompTIA A+ Certification
5 Days

→ If you are ready for a career as an entry-level information technology (IT) professional or computer service technician, the CompTIA A+ course is the first step in your preparation.

CompTIA Advanced Security Practitioner (CASP)
5 Days

→ The current landscape of cybersecurity requires specialized skills to troubleshoot via customized hacks and build solid solutions. Each hack is unique and must be combated with master-level security skills and experience. As a CASP-certified IT professional, you will demonstrate that you can provide the best cybersecurity solutions

CompTIA CLoud Essentials+ (SF)
3 Days

Course reference number: TGS-2023041079 (ILT)

→ In this course, participants will weigh pros and cons of cloud computing to make effective decisions and meet IT challenges.

CompTIA Cloud+
5 Days

→ This 5-day course will help students with the knowledge and best practices required of IT practitioners working in cloud computing environments and who must understand and deliver cloud infrastructure.

CompTIA Cybersecurity Analyst (CySA+)
5 Days

→ In this 5-day course, participants use their knowledge and skills required to configure and use threat detection tools, perform data analysis and interpret the results to identify vulnerabilities, threats and risks to an organization, with the end goal of securing and protecting applications and systems within an organization.

CompTIA IT Fundamentals
3 Days

→ Participants will identify PC components, work with files and folders, and conduct basic software installations. This course will provide participants with the fundamental skills and concepts required to maintain, support, and work efficiently with personal computers.

CompTIA Linux+ Certification
5 Days

→ The Official CompTIA® Linux+® courseware builds on your existing experience with systems operations and administration to provide you with the knowledge and skills required to configure, manage, operate, and troubleshoot a Linux environment by using security best practices, scripting, and automation.

CompTIA Network+ (SF)
5 Days

Course reference number: TGS-2022016932 (ILT)
                                     TGS-2023036612 (OLL)

→ In this 5-day course, participants will equip with knowledge and understanding of networking concepts and acquire skills to prepare for a career in network support or administration.

CompTIA Server+ Certification
5 Days

→ This 5-day course authenticates the knowledge of server hardware and software. This course also implements and monitors security on networks, applications, and operating systems, and respond to security breaches.

CompTIA Security+ (SF)
5 Days

Course reference number: TGS-2022016933 (ILT)
                                     TGS-2023036611 (OLL)

→ This 5-day course provides an excellent introduction to the security field and is typically a better entry point than jumping right into an advanced security program.

Other Emerging Technologies

Technology advancement keeps going rapidly in this modern world. Stay updated with the dynamic IT field by enrolling to ITEL's other emerging technologies courses.

Other Emerging Technologies

CT003A – AWS SysOps Administrator Certification Bootcamp (Associate Level) — 5 Days

A hands-on course on AWS that focuses on advance architecture and design patterns used in AWS infrastructure. AWS provides cloud computing services that enable a business to build sophisticated and scalable applications.

CT003A – AWS SysOps Administrator Certification Bootcamp (Associate Level) — 5 Days

AWS provides cloud computing services that enable a business to build sophisticated and scalable applications. Therefore, knowledge about these services and learning how to work with them on the Cloud is crucial for businesses and Professionals who are or will be working on the cloud.

Design Mobile Applications on Android OS Platform (SF) — 5 Days

Course Reference Number: TGS-2018500763

This 5-day course provides participants to develop mobile application using software development methodologies and design thinking based on the relevant industry standards. This course also illustrates the common issues arise in mobile application development, including the pros and cons of different mobile operating systems.

Xamarin Mobile Application Development for iOS and Android — 4 Days

In this 4-day course, you will learn about the Xamarin environment. You will also learn about cross-platform developments: Xamarin.Android and Xamarin.iOS.

ChatGPT for Business Professional — 2 Days

The program's goal is to facilitate your understanding of AI capabilities, leading to increased efficiency in your workflow and heightened productivity. Imagine streamlined processes, more effective and faster communication, and a treasure trove of data at your fingertips for well-informed research. We take you on a journey where you can seamlessly integrate these powerful tools into your professional life.

Java SE 8 Programming Ed 1 — 5 Days

The Java SE 8 certification training at Koenig introduces participants to object oriented programming concepts such as classes, inheritance, encapsulation, polymorphism etc. using Java language. This Java programming training includes the use of objects, strings, arrays, loops and Predicate Lambda expression.

SUSE Linux Enterprise Server 15 Administrator — 4 Days

This course is designed for those who are seeking a fundamental understanding of the SUSE Linux Enterprise Server (SLES) operating system. Students will be able to configure a SLES 15 server and integrate it into an existing network.

Cisco Certified Network Associate [CCNA] (SF) — 5 Days

Course reference number: TGS-2023021385 (ILT)
TGS-2023035647 (OLL)

This 5-day course focuses on how to install, operate, configure, and verify a basic IPv4 and IPv6 network, including configuring a LAN switch, configuring an IP router, connecting to a WAN, and identifying basic security threats.

Other Emerging Technologies

Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR)
5 Days

→ The Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR) v1.1 course gives you the knowledge and skills needed to configure, troubleshoot, and manage enterprise wired and wireless networks.

Implementing Cisco Enterprise Advanced Routing and Services (ENARSI) v1.0
5 Days

→ The Implementing Cisco Enterprise Advanced Routing and Services (ENARSI) v1.0 gives you the knowledge you need to install, configure, operate, and troubleshoot an enterprise network.

Designing Cisco Enterprise Wireless Networks (ENWLSD) v1.0
5 Days

→ The Designing Cisco Enterprise Wireless Networks (ENWLSD) v1.0 course gives you the knowledge you need to design Cisco® wireless networks. The course covers design specifics from scenario design concepts through the installation phase and into post-deployment validation.

Implementing Cisco SD-WAN Solutions (SDWAN300) v1.0
5 Days

→ The Implementing Cisco SD-WAN Solutions (SDWAN300) v1.0 course gives you deep-dive training about how to design, deploy, configure, and manage your Cisco® Software-Defined WAN (SD-WAN) solution in a large-scale live network, including how to migrate from legacy WAN to SD-WAN.

Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR)
5 Days

→ The Designing Cisco Enterprise Networks (ENSLD) v1.0 course gives you the knowledge and skills you need to design an enterprise network. This course serves as a deep dive into enterprise network design and expands on the topics covered in the Implementing and Operating Cisco® Enterprise Network Core Technologies (ENCOR) v1.0 course.

Implementing Cisco Enterprise Wireless Networks (ENWLSI) v1.1
5 Days

→ The Implementing Cisco Enterprise Wireless Networks (ENWLSI) v1.1 course gives you the knowledge and skills needed to create a secure wireless network infrastructure and troubleshoot any related issues.

Implementing Automation for Cisco Enterprise Solutions (ENAUI) v1.2
3 Days

→ Implementing Automation for Cisco Enterprise Solutions (ENAUI) v.1.2 teaches you how to implement Cisco Enterprise automated solutions, including programming concepts, orchestration, telemetry, and automation tools.

Implementing Automation for Cisco Enterprise Solutions (ENAUI) v1.2
5 Days

→ The Implementing Cisco NX-OS Switches and Fabrics in the Data Center (DCNX) v1.0 course gives you a detailed understanding of the Cisco® Nexus switch platform and teach you how to install, configure, and manage Cisco Nexus® switch platforms in a scalable, available environment.

Learn to Succeed

Other Emerging Technologies

DCCOR: Implementing and Operating Cisco Data Centre Core technologies
5 Days

The Implementing and Operating Cisco Data Center Core Technologies (DCCOR) v1.2 course helps you prepare for the Cisco® CCNP® Data Center and CCIE® Data Center certifications for advanced-level data center roles. In this course, you will master the skills and technologies you need to implement data center compute, LAN and SAN infrastructure. You will also learn the essentials of automation and security in data centers.

CKA: Certified Kubernetes Administrator
5 Days

The Ultimate CKA course is one of the most organized CKA courses in the market right now. You will get 360-Degree Preparation at the individual topic level. You will be provided with all the resources to help you pass your CKA certification with a good percentile.

CKAD: Certified Kubernetes Application Developer
5 Days

This course helps you gain the knowledge required to design and deploy cloud-native applications on a Kubernetes cluster. A series of well-designed lectures with animation and illustration help you understand complex concepts easily.

Big Data Analytics (SF)
5 Days

Course reference number: TGS-2018501865 (ILT)

This course provides students with concepts beyond the Big Data knowledge to get a head start with Hadoop. Students will be exposed to a wide plethora of tools in Hadoop. This course will also explore on data analysis using Hadoop Ecosystem for data analysts, business intelligence specialists, developers and system architects

RH124: Red Hat System Administration I
5 Days

This course is the first of a two-course series that takes a computer professional without Linux system administration knowledge to become a fully capable Linux administrator. These concepts are further developed in the follow-on course, Red Hat System Administration II (RH134).This course is based on Red Hat® Enterprise Linux 9.0.

RH134: Red Hat System Administration II
5 Days

This course is for individuals who have completed Red Hat® System Administration I (RH124). It focuses on the key tasks needed to become a full-time administrator of Red Hat Enterprise Linux 9. Attending both Red Hat® System Administration I (RH124) and Red Hat® System Administration II (RH134) can help you in your preparation for the Red Hat Certified System Administrator Exam (EX200).

RH199: Red Hat RHCSA Rapid Track Course
5 Days

The RHCSA Rapid Track course (RH199) features Red Hat® Enterprise Linux® 9 and is designed for those who already have significant experience with Linux administration. This course combines the significant content of Red Hat System Administration I (RH124) and Red Hat System Administration II (RH134), reviewing the tasks at an accelerated pace. This course is based on Red Hat® Enterprise Linux 9.0.

RH294: Red Hat enterprise Linux Automation with Ansible
5 Days

Red Hat Enterprise Linux Automation with Ansible (RH294) is designed for Linux administrators and developers who need to automate repeatable and error-prone steps for system provisioning, configuration, application deployment, and orchestration.

Other Emerging Technologies

CKAD: Certified Kubernetes Application Developer
5 Days

→ This course helps you gain the knowledge required to design and deploy cloud-native applications on a Kubernetes cluster. A series of well-designed lectures with animation and illustration help you understand complex concepts easily.

CISM: Certified Information Security Manager
5 Days

→ Data breaches, ransomware attacks and other constantly evolving security threats are top-of-mind for today's IT professionals. With a Certified Information Security Manager® (CISM®) certification, you'll learn how to assess risks, implement effective governance and proactively respond to incidents.

CISA: Certified Information Systems Auditor
5 Days

→ Certified Information Systems Auditor® (CISA®) is world-renowned as the standard of achievement for those who audit, control, monitor and assess an organization's IT and business systems. If you are a mid-career professional, CISA can showcase your expertise and assert your ability to apply a risk-based approach to planning, executing and reporting on audit engagements.

Cloud Technology Solutions Architect Associate (SF)
5 Days

Course reference number: TGS-2023021390 (ILT)
TGS-2023021370 (OLL)

→ A hands-on course on AWS that focuses on advance architecture and design patterns used in AWS infrastructure. AWS provides cloud computing services that enable a business to build sophisticated and scalable applications.

Microsoft Technical

Deepen your knowledge on Microsoft's public cloud computing platform. Find out the fundamentals, core infrastructure, server services, data science solutions, security technologies, SQL solutions, and more.
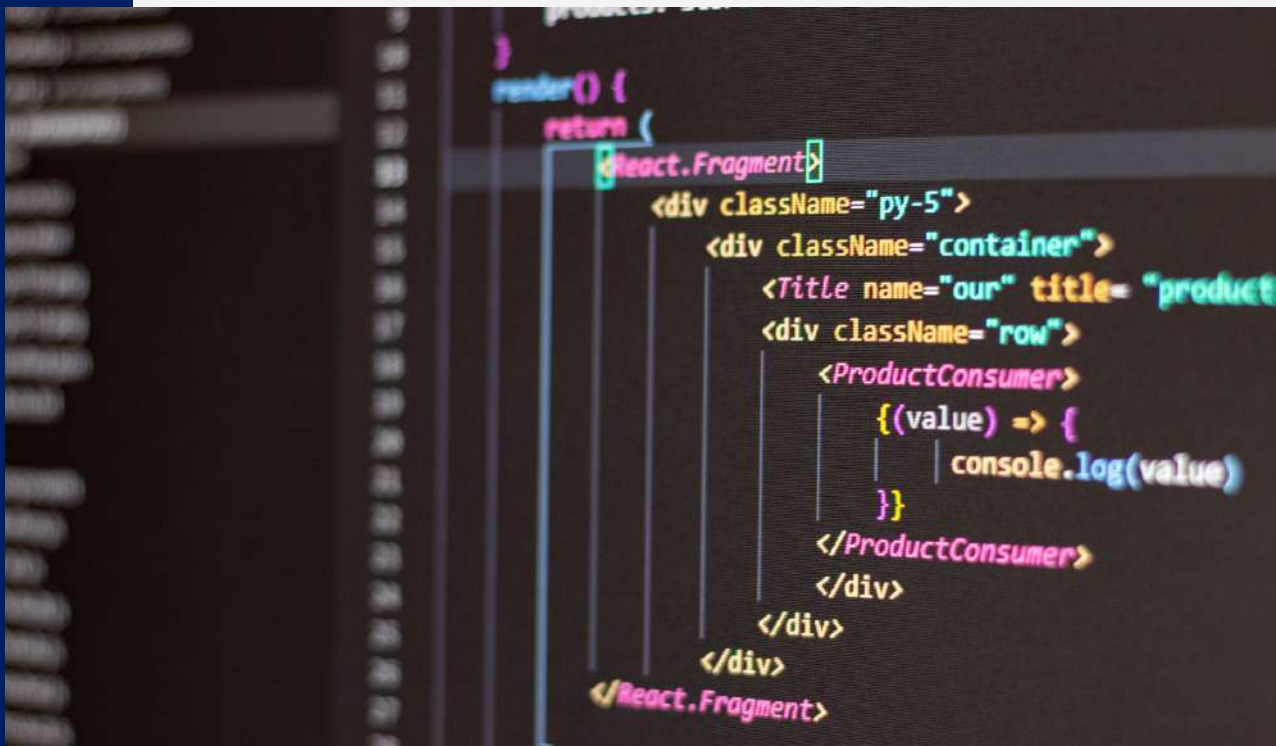

Microsoft Technical

Windows Server 2019 Administration (SF)

5 Days

Course reference number: TGS-2023021387 (ILT)
TGS-2023035648 (OLL)

→ This five-day instructor-led course is designed primarily for IT professionals who have some experience with Windows Server. It is designed for professionals who will be responsible for managing identity, networking, storage and compute by using Windows Server 2019, and who need to understand the scenarios, requirements, and options that are available and applicable to Windows Server 2019.

Implementing SQL Database Administration (SF)

5 Days

Course reference number: TGS-2018501830 (ILT)

→ Also known as the Administering a SQL Database Infrastructure (20764) course, this 5-day instructor-led course provides participants who administer and maintain SQL Server databases with the knowledge and skills to administer a SQL server database infrastructure. Additionally, it will be of use to individuals who develop applications that deliver content from SQL Server databases.

Implementing Microsoft Azure Infrastructure Solutions (SF)

5 Days

Course reference number: TGS-2023035652 (ILT)
TGS-2023021369 (OLL)

→ This course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, backup and share data, and monitor your solution.

Microsoft Azure Security Technologies (SF)

5 Days

Course reference number: TGS-2022017403 (ILT)

→ This course provides IT Security Professionals with the knowledge and skills needed to implement security controls, maintain an organization's security posture, and identify and remediate security vulnerabilities. This course includes security for identity and access, platform protection, data and applications, and security operations.

AZ-600 Configuring and Operating a Hybrid Cloud with Microsoft Azure Stack Hub

4 Days

→ Lessons include deploying Azure Stack Hub, managing the Azure Stack Hub Marketplace, offering App Services and Event Hub resource providers, managing Azure Stack Hub registration, and maintaining system health.

AZ-700 Designing and Implementing Microsoft Azure Networking Solutions

3 Days

→ This course teaches Azure administrators and Azure Stack Hub operators how to plan, deploy, package, update, and maintain the Azure Stack Hub infrastructure.

AZ-800 Administering Windows Server Hybrid Core Infrastructure

4 Days

→ This course teaches IT Professionals how to manage core Windows Server workloads and services using on-premises, hybrid, and cloud technologies. The course teaches IT Professionals how to implement and manage on-premises and hybrid solutions such as identity, management, compute, networking, and storage in a Windows Server hybrid environment.

Microsoft Technical

AZ-801 Configuring Windows Server Hybrid Advanced Services
4 Days

→ This course teaches IT Professionals to configure advanced Windows Server services using on-premises, hybrid, and cloud technologies.

AI-102 Designing and Implementing a Microsoft Azure AI Solution
4 Days

→ AI-102 Designing and Implementing an Azure AI Solution is intended for software developers wanting to build AI infused applications that leverage Azure Cognitive Services, Azure Cognitive Search, and Microsoft Bot Framework. The course will use C# or Python as the programming language.

DP-100 Designing and Implementing a Data Science Solution on Azure
4 Days

→ Learn how to operate machine learning solutions at cloud scale using Azure Machine Learning. This course teaches you to leverage your existing knowledge of Python and machine learning to manage data ingestion and preparation, model training and deployment, and machine learning solution monitoring in Microsoft Azure.

DP-420 Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB
3 Days

→ This course teaches developers how to create application using the SQL API and SDK for Azure Cosmos DB. Students will learn how to write efficient queries, create indexing policies, manage and provisioned resources, and perform common operations with the SDK.

DP-300 Administering Microsoft Azure SQL Solutions
4 Days

→ This course provides students with the knowledge and skills to administer a SQL Server database infrastructure for cloud, on-premises and hybrid relational databases and who work with the Microsoft PaaS relational database offerings. Additionally, it will be of use to individuals who develop applications that deliver content from SQL-based relational databases.

DP-500 Designing and Implementing Enterprise-Scale Analytics Solutions Using Microsoft Azure and Microsoft Power BI
4 Days

→ This course teaches Azure Solution Architects how to design infrastructure solutions.

AZ-305 Designing Microsoft Azure Infrastructure Solutions
4 Days

→ This course teaches Azure Solution Architects how to design infrastructure solutions. Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles.

AZ-400 Designing and Implementing Microsoft DevOps Solutions*
4 Days

→
- Configure processes and communications
- Design and implement source control
- Design and implement build and release pipelines
- Develop a security and compliance plan
- Implement an instrumentation strategy

Microsoft Technical

AZ-900 Microsoft Azure Fundamentals
1 Day

➝ This exam is designed for candidates looking to demonstrate foundation level knowledge of cloud services and how those services are provided with Microsoft Azure. The exam is intended for candidates with non-technical backgrounds, such as those involved in selling or purchasing cloud based solutions and services or who have some involvement with cloud based solutions and services, as well as those with a technical background who have a need to validate their foundation level knowledge around cloud services. Technical IT experience is not required however some general IT knowledge or experience would be beneficial.

AI-900 Microsoft Azure AI Fundamentals
1 Day

➝ This course introduces fundamentals concepts related to artificial intelligence (AI), and the services in Microsoft Azure that can be used to create AI solutions. The course is not designed to teach students to become professional data scientists or software developers, but rather to build awareness of common AI workloads and the ability to identify Azure services to support them.

AZ-204 Developing solutions for Microsoft Azure
5 Days

➝ This course teaches developers how to create end-to-end solutions in Microsoft Azure. Students will learn how to implement Azure compute solutions, create Azure Functions, implement and manage web apps, develop solutions utilizing Azure storage, implement authentication and authorization, and secure their solutions by using KeyVault and Managed Identities.

IMPROVE YOUR HACKING SKILLS AND ABILITIES WITH THESE THREE EXAMS!

Knowledge	Skills/Abilities	Your Proof!
CEH v12	CEH ETHICAL HACKER PRACTICAL	CEH MASTER
4 Hours Multiple-Choice Exam	6 Hours 20 Practical Challenges	Attain Mastery!

ITEL provides exclusive hands-on for these three exams.

Let's train to become the driving force behind your company's cybersecurity defence!

Microsoft Power Platform

As individuals and teams within an organization, you can learn how to become a powerful citizen developers by mastering Microsoft Power Platform.

ITEL Learning Systems (S) Pte Ltd
1 Maritime Square, #10-24/25
(Lobby B) Singapore 099253
Phone: +65 6822 8282 | Email: info@itel.com.sg
itellearningsystems

Microsoft Power Platform

PL-900 Microsoft Power Platform Fundamentals
1 Day

→ Learn the business value and product capabilities of Microsoft Power Platform. Create simple Power Apps, connect data with Dataverse, build a Power BI Dashboard, and automate processes with Power Automate.

PL-100 Microsoft Power Platform App Maker
4 Days

→ This course will teach you how to build apps with low-code techniques to simplify, automate, and transform business tasks and processes using Microsoft Power Platform.

PL-200 Microsoft Power Platform Functional Consultant
4 Days

→ This course will teach you to use Microsoft Power Platform solutions to simplify, automate, and empower business processes for organizations in the role of a Functional Consultant.

PL-300 Microsoft Power BI Data Analyst
3 Days

→ This course covers the various methods and best practices that are in line with business and technical requirements for modeling, visualizing, and analyzing data with Power BI.

PL-400 Microsoft Power Platform Developer
5 Days

→ The Microsoft Power Platform helps organizations optimize their operations by simplifying, automating and transforming business tasks and processes. In this course, students will learn how to build Power Apps, Automate Flows and extend the platform to complete business requirements and solve complex business problems.

PL-500 Microsoft Power Automate RPA Developer
4 Days

→ Candidates for this course automate time-consuming and repetitive tasks by using Microsoft Power Automate.

PL-600 Microsoft Power Platform Solution Architect
3 Days

→ In this course, students will learn about decisions a Solution Architect makes during an implementation, covering security, integrations, Power Apps architecture, Power Automate architecture, and more.

Microsoft Security, Compliance, and Identity

SC-900 Microsoft Security, Compliance, and Identity Fundamentals
1 Day

→ This course provides foundational level knowledge on security, compliance, and identity concepts and related cloud-based Microsoft solutions.

SC-200 Microsoft Security Operations Analyst
4 Days

→ Learn how to investigate, respond to, and hunt for threats using Microsoft Sentinel, Microsoft Defender for Cloud, and Microsoft 365 Defender. In this course you will learn how to mitigate cyberthreats using these technologies. Specifically, you will configure and use Microsoft Sentinel as well as utilize Kusto Query Language (KQL) to perform detection, analysis, and reporting.

SC-300 Microsoft Identity and Access Administrator
4 Days

→ The Microsoft Identity and Access Administrator course explores how to design, implement, and operate an organization's identity and access management systems by using Azure AD.

SC-400 Microsoft Information Protection Administrator
4 Days

→ As an information protection and compliance administrator, you plan and implement risk and compliance controls in the Microsoft Purview compliance portal. In this role, you translate an organization's risk and compliance requirements into technical implementation. You're responsible for implementing and managing solutions for content classification, data loss prevention (DLP), information protection, data lifecycle management, records management, privacy, risk, and compliance.

SC-100 Microsoft Cybersecurity Architect
4 Days

→ This is an advanced, expert-level course. Although not required to attend, students are strongly encouraged to have taken and passed another associate level certification in the security, compliance and identity portfolio (such as AZ-500, SC-200 or SC-300) before attending this class.This course prepares students with the expertise to design and evaluate cybersecurity strategies in the following areas: Zero Trust, Governance Risk Compliance (GRC), security operations (SecOps), and data and applications.

Microsoft 365

Achieve more in your professional life with the innovative and dynamic Office apps. Increase the productivity and run your business better today.

Microsoft 365

MS-900 Microsoft 365 Fundamentals
1 Day

This course introduces Microsoft 365, an integrated cloud platform that delivers industry-leading productivity apps along with intelligent cloud services, and world-class security. You'll learn foundational knowledge on the considerations and benefits of adopting cloud services and the Software as a Service (SaaS) cloud model, with a specific focus on Microsoft 365 cloud service offerings. You will begin by learning about cloud fundamentals, including an overview of cloud computing.

MD-102: Microsoft 365 Endpoint Administrator
5 Days

This course will cover the most important features and functionalities needed by Dynamics 365 Supply Chain Management functional consultant including: The product information and how to configure, create, and manage your product and inventory.

MS-203 Microsoft 365 Messaging
5 Days

This course examines the key elements of Microsoft 365 messaging administration, including message transport and mail flow, messaging security, hygiene, and compliance, messaging infrastructure, and hybrid messaging. This course is designed for persons who are aspiring to be Messaging Administrators in a Microsoft 365 deployment.

MS-740 Troubleshooting Microsoft Teams
3 Days

Support engineers are expected to use advanced troubleshooting methods to support Microsoft Teams environments, analyze telemetry and log data, troubleshoot deployments, and tune performance. You also need to review logs and other data, infer the root cause of an issue, and provide a fix.

MS-600 Building applications and solutions with Microsoft 365 core services
5 Days

This exam measures your ability to accomplish the following technical tasks: implement Microsoft identity; build apps with Microsoft Graph; extend and customize SharePoint; extend Teams; and extend Office. Candidates for this exam are Microsoft 365 developers who design, build, test, and maintain applications and solutions that are optimized for the productivity and collaboration needs of organizations using the Microsoft 365 platform.

MS-700 Managing Microsoft Teams
4 Days

The Managing Microsoft Teams course is designed for persons who are aspiring to the Microsoft 365 Teams Admin role. Microsoft Teams admins configure, deploy, and manage Office 365 workloads for Microsoft Teams that focus on efficient and effective collaboration and communication in an enterprise environment.

MS-050 SharePoint Hybrid Deployment and Migration
5 Days

In this course, you will learn how to deploy and configure the SharePoint Server 2019, designed to meet the demands of modern workstyles as organizations start to configure hybrid environments and migrate content to the cloud as the solution

MS-220 Troubleshoot Microsoft Exchange Online
3 Days

Candidates for this exam identify, troubleshoot, and resolve issues with Microsoft Exchange Online, hybrid Exchange environments, and related Exchange components, technologies, and services. Candidates work with customers and other stakeholders to understand the details of any issues.

Microsoft 365

MS-102 Microsoft 365 Administrator

5 Days

→ Learn how to configure Microsoft 365 tenant, including organizational profile, tenant subscription options, component services, user accounts and licenses, security groups, and administrative roles. Transition to configuring Microsoft 365 with a primary focus on configuring Office client connectivity. Finally, explore how to manage user-driven client installations of Microsoft 365 Apps for enterprise deployments.

MS-500 Microsoft 365 Security Administration

5 Days

→ In this course you will learn how to secure user access to your organization's resources. The course covers user password protection, multi-factor authentication, how to enable Azure Identity Protection, how to setup and use Azure AD Connect, and introduces you to conditional access in Microsoft 365. You will learn about threat protection technologies that help protect your Microsoft 365 environment. Specifically, you will learn about threat vectors and Microsoft's security solutions to mitigate threats.

MS-720 Microsoft Teams Voice Engineer

3 Days

→ In this course, you will learn how to plan, design, configure, maintain, and troubleshoot an integrated communications solution at an organization using Microsoft Teams. The course will cover Teams Phone with Calling Plans, Direct Routing, Operator Connect, and Teams Phone Mobile, in addition to Teams devices, audio/video conferencing, and voice migration. Students will learn troubleshooting methodologies and how to resolve common telephony and voice problems.

MICROSOFT EXCEL COURSE

Excel will simplify building a budget, calculating payments on significant purchases, keeping organised checklists, and analysing financial performance such as business profit or loss.

Let's master basic and advanced skills like:

Formulas	Conditional
Charts	Formatting
Pivot Tables	Data Analysis

Microsoft Dynamics 365

Deliver more effective and efficient business operations within your company by employing this portfolio of intelligent business applications.

Microsoft Dynamics 365

MB-910 Microsoft Dynamics 365 Fundamentals (CRM)
1 Day

→ This course will provide you with a broad introduction to the customer engagement capabilities of Dynamics 365.

MB-920 Microsoft Dynamics 365 Fundamentals (ERP)
1 Day

→ This course will provide you with a broad introduction to the finance and operations capabilities of Dynamics 365.

MB-210 Microsoft Dynamics 365 Sales
2 Days

→ Microsoft Dynamics 365 Sales is an end-to-end application to manage the handling of customers and potential customers.

MB-220 Microsoft Dynamics 365 Marketing
4 Days

→ This course will review the marketing application configuration needed to drive business growth.

MB-230 Microsoft Dynamics 365 Customer Service
4 Days

→ Microsoft Dynamics 365 Customer Service offers any organization an opportunity for customer success.

MB-240 Microsoft Dynamics 365 Field Service
4 Days

→ Learn how to effectively configure a Dynamics 365 for Field Service implementation to maximize the tools and features available to efficiently manage a mobile work force.

MB-300 Microsoft Dynamics 365: Core Finance and Operations
2 Days

→ This course covers the following core features in Dynamics 365: core common features, core configuration, data migration, and preparing to go live.

MB-310 Microsoft Dynamics 365 Finance
4 Days

→ This course covers the financial aspects of Dynamics 365: configure and use essential financial components, accounts payable, accounts receivable, collections, budgeting, fixed assets, and additional functionality

MB-320 Microsoft Dynamics 365 Supply Chain, Management, Manufacturing
4 Days

→ This course is designed to build your foundation in Dynamics 365 Supply Chain Management, Manufacturing application knowledge.

MB-500 Microsoft Dynamics 365: Finance and Operations Apps Developer
5 Days

→ In this course we discuss the tasks needed to fulfill the role of developer in Dynamics 365 Finance and Operations Apps. The Dynamics 365 Finance and Operations apps developer is a key technical resource that implements and extends the application to meet the business requirements.

MB-700 Microsoft Dynamics 365: Finance and Operations Apps Solution Architect
4 Days

→ This course is designed to prepare those who are aspired to be solution architects and those who are new to this role to learn more about the technical information that solution architects will be dealing with during implantation.

Learn to Succeed

Microsoft Dynamics 365

MB-800: Microsoft Dynamics 365 Business Central Functional Consultant

4 Days

→ Built and optimized for small and medium businesses, Dynamics 365 Business Central is an application for companies that have outgrown their entry-level business applications. Growing businesses often outgrow their basic accounting software or legacy enterprise resource planning (ERP) systems that are unable to handle increased inventory and transactions, lack integration with other line-of-business systems, and have reporting limitations.

MB-340 Microsoft Dynamics 365 Commerce Functional Consultant

4 Days

→ Growing businesses often outgrow their basic accounting software or legacy enterprise resource planning (ERP) systems that are unable to handle increased inventory and transactions, lack integration with other line-of-business systems, and have reporting limitations.

MB-260 Microsoft Customer Data Platform Specialty

4 Days

→ In this course, students will learn about the Dynamics 365 Customer Insights solution, including how to unify customer data with prebuilt connectors, predict customer intent with rich segmentation, and maintain control of customer data.

MB-330 Microsoft Dynamics 365 Supply Chain Management - Functional Consultant

4 Days

→ Candidates for this exam are supply chain management functional consultants who design and configure Dynamics 365 Supply Chain Management and related tools and technologies to meet the requirements for a customer. They analyze business requirements and translate those requirements into fully realized business processes and solutions that implement industry-recommended practices. Candidates partner with architects, developers, consultants, and other stakeholders to deliver solutions that meet or exceed the needs of their customers.

VMware

Be a better virtualization software developer by learning how to create abstract layers over computer hardware through these VMware courses.

VMware

Vmware vSphere: Install, Configure, Manage (SF)
5 Days

Course reference number: TGS-2018501516 (ILT)

→ This five-day course features intensive hands-on training that focuses on installing, configuring, and managing VMware vSphere® 7, which includes VMware ESXi™ 7 and VMware vCenter Server® 7.

VMware vSphere: Troubleshooting [V7]
5 Days

→ This five-day, hands-on training course provides you with the advanced knowledge, skills, and abilities to achieve competence in troubleshooting the VMware vSphere® 7.x environment.

VMware vSphere: Fast Track [V7]
5 Days

→ This five-day, intensive course takes you from introductory to advanced VMware vSphere® 7 management skills.

VMware vSphere: Advanced Administration Workshop [V7]
5 Days

→ This five-day course provides hands-on training to equip students with a range of skills: from performing routine VMware vSphere® 7 administrative tasks to complex vSphere operations and configurations.

VMware vSphere: Optimize and Scale plus Troubleshooting Fast Track [V7]
5 Days

→ This five-day, accelerated, hands-on training course is a blend of the VMware vSphere®: Optimize and Scale and VMware vSphere: Troubleshooting courses.

VMware vSphere: Design [V7]
3 Days

→ This three-day course provides hands-on training to equip students with a range of skills: from performing routine VMware vSphere® 7 administrative tasks to complex vSphere operations and configurations.

VMware NSX: Install, Configure, Manage [V6.4]
5 Days

→ This five-day, comprehensive, fast-paced training course presents VMware NSX® as a part of the software-defined data center. You will learn how to use logical switching in NSX to virtualize your switching environment.

VMware NSX: Troubleshooting and Operations [V6.4]
5 Days

→ This five-day, hands-on training course provides you with the advanced knowledge, skills, and tools to achieve competence in operating and troubleshooting the VMware NSX® 6.4 environment.

VMware NSX: Install, Configure, Manage plus Troubleshooting and Operations Fast Track [V6.4]
5 Days

→ This intensive five-day, extended-hours course focuses on configuring and troubleshooting a VMware NSX® deployment.

VMware NSX-T Data Center: Install, Configure, Manage [V3.0]
5 Days

→ This five-day, fast-paced course provides comprehensive training on how to install, configure, and manage a VMware NSX-T™ Data Center environment.

VMware

VMware NSX-T Data Center: Troubleshooting and Operations [V3.0]
5 Days

→ This five-day, hands-on training course provides you with the advanced knowledge, skills, and tools to achieve competency in operating and troubleshooting the VMware NSX-T™ Data Center environment.

VMware NSX-T Data Center: Design [V3.0]
5 Days

→ This five-day course provides comprehensive training on considerations and practices to design a VMware NSX-T™ Data Center environment as part of a software-defined data center strategy.

VMware Horizon 8: Skills for Virtual Desktop Management
3 Days

→ This three-day, hands-on course gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform.

VMware Horizon 8: Infrastructure Administration
5 Days

→ This two-day, hands-on course gives you the skills to install and configure a virtual desktop infrastructure platform.

VMware Workspace ONE: Integrating the Digital Workspace [V21.x]
2 Days

→ With the VMware Workspace ONE platform, you can easily and securely deploy and manage any application on any device. It integrates access controls, application management, and endpoint management across all platforms and is available as a cloud service or on-premise deployment.

VMware Horizon 8: Deploy and Manage plus App Volumes Fast Track
5 Days

→ This five-day accelerated, hands-on training course is a blend of VMware Horizon® 8: Skills for Virtual Desktop Management, VMware Horizon 8: Infrastructure Administration, and VMware App Volumes™, and VMware Dynamic Environment Manager™.

VMware Horizon 8: Virtual Desktop Troubleshooting
2 Days

→ This two-day course builds your skills in resolving common issues that occur in a VMware Horizon® environment.

VMware Workspace ONE: Deploy and Manage [V21.x]
5 Days

→ In this five-day course, you learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multi-platform endpoint management solution with VMware Workspace ONE® UEM.

VMware Workspace ONE: Advanced Integration [V20.x]
5 Days

→ In this five-day course, you learn about the advanced VMware Workspace ONE® use cases and integrations.

VMware Carbon Black App Control Administrator
1 Day

→ This one-day course teaches you how to use the VMware Carbon Black® App Control™ product and leverage the capabilities to configure and maintain the system according to their organization's security posture and organizational policies.

VMware

VMware Carbon Black EDR Administrator
1 Day

→ This one-day course teaches you how to use the VMware Carbon Black® EDR™ product and leverage the capabilities to configure and maintain the system according to your organization's security posture and policies.

VMware Carbon Black Portfolio: Configure and Manage
5 Days

→ This course provides an in-depth, technical understanding of the Carbon Black Portfolio through comprehensive coursework, hands-on labs, and scenario-based exercises.

VMware Carbon Black App Control Advanced Administrator
1 Day

→ This one-day course teaches you how to configure and scope the rules within VMware Carbon Black® App Control™ product to maintain the system according to your organization's security posture and organizational policies.

VMware Carbon Black Cloud Audit and Remediation
1 Day

→ This one-day course teaches you how to use the VMware Carbon Black® Cloud Audit and Remediation™ product to build queries for IT hygiene, incident response, and vulnerability assessment to support your organization's security posture and policies.

VMware Carbon Black Cloud Endpoint Standard
1 Day

→ This one-day course teaches you how to use the VMware Carbon Black Cloud Endpoint™ Standard product and leverage the capabilities to configure and maintain the system according to your organization's security posture and policies.

VMware Carbon Black Cloud Enterprise EDR
1 Day

→ This one-day course teaches you how to use the VMware Carbon Black® Cloud Enterprise EDR™ product and leverage its capabilities to configure and maintain the system according to your organization's security posture and policies.

VMware Carbon Black EDR Advanced Administrator
1 Day

→ This one-day course teaches you how to use the advanced features of the VMware Carbon Black® EDR™ product.

VMware Carbon Black EDR Advanced Analyst
1 Day

→ This one-day course teaches you how to use the VMware Carbon Black® EDR™ product during incident response.

VMware vSphere: Operate, Scale and Secure [V8]
5 Days

→ This five-day course teaches you advanced skills for configuring and maintaining a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you configure and optimize the VMware vSphere 8 features that build a foundation for a truly scalable infrastructure.

VMware vSphere: Operate, Scale and Secure [V8]
5 Days

→ This five-day course teaches you advanced skills for configuring and maintaining a highly available and scalable virtual infrastructure. Through a mix of lecture and hands-on labs, you configure and optimize the VMware vSphere® 7 features that build a foundation for a truly scalable infrastructure, and you discuss when and where these features have the greatest effect.

Learn to Succeed

VMware

VMware Horizon 8: Virtual Desktop Bootcamp
5 Days

→ VMware Horizon® 8: Virtual Desktop Bootcamp is a five-day combination course of VMware Horizon 8: Skills for Virtual Desktop Management & VMware Horizon 8: Virtual Desktop Troubleshooting. This training collection gives you the skills to deliver virtual desktops and applications through a single virtual desktop infrastructure platform.

VMware Workspace ONE: Unified Endpoint Management Bootcamp [V21.x]
5 Days

→ In this five-day course VMware Workspace ONE: UEM Bootcamp [V21.x], you learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multi-platform endpoint management solution with VMware Workspace ONE® UEM.

VMware Workspace ONE: Unified Endpoint Mgmt Troubleshooting, Adv Integration, and Design Fast Track [V20.x]
5 Days

→ In this five-day, extended hour course, you learn how to navigate and manage the VMware Workspace ONE® Access™ console (formerly known as the VMware Identity Manager™ console). Through a combination of hands-on labs, simulations, and interactive lectures, you learn to investigate, analyze, and determine issues that might occur with all the different components of the VMware Workspace ONE® UEM (Unified Endpoint Management) platform.

VMware Horizon 8: Deploy and Manage
2 Days

→ VMware Horizon 8: Deploy and Manage is a five-day combination course of VMware Horizon 8: Skills for Virtual Desktop Management & VMware Horizon 8: Infrastructure Administration.

VMware Workspace ONE: Skills for Unified Endpoint Management [V21.x]
3 Days

→ In this three-day course, you learn how to apply the fundamental techniques for launching and maintaining an intelligence-driven, multi-platform endpoint management solution with VMware Workspace ONE®. Through a combination of hands-on labs, simulations, and interactive lectures, you will configure and manage the endpoint life cycle. After the three days, you will have the foundational knowledge for effectively implementing VMware Workspace ONE® UEM.

VMware Workspace ONE: Unified Endpoint Management Troubleshooting [V21.x]
2 Days

→ In this two-day course, you learn to investigate, analyze, and determine issues that might occur with all the different components of VMware Workspace ONE® UEM. Understanding how to effectively troubleshoot product issues enables administrators to understand how product services communicate and function—in turn optimizing service and software health management. Troubleshooting is the backbone of service maintenance and management.

VMware Workspace ONE: Design [V20.x]
1 Day

→ By the end of the course, you should be able to meet the following objectives:
- Summarize the main phases in the Workspace ONE product solution design
- Compare a logical design and a physical design
- Identify the main Workspace ONE use cases
- Collect and consolidate the required uses cases and user experiences
- Match use cases with Workspace ONE components
- Create a logical solution architecture based on use cases
